VOICE SOLUTIONS

# Lydia® Plug&Play

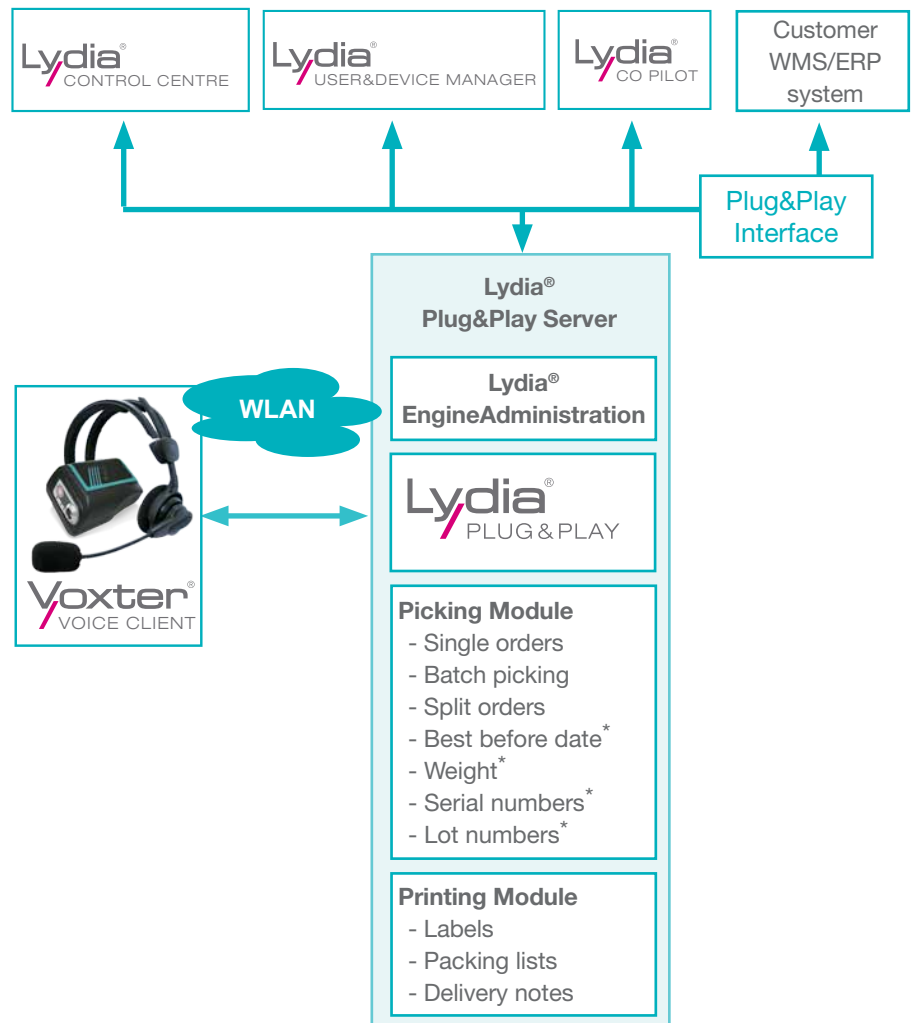

Employing voice technology in the warehouse is now easier than ever! Lydia® Plug&Play is a preconfigured out of the box package for voice picking applications for up to 25 users.

All necessary components for a simple and successful upgrade to a “speaking warehouse” are already included, such as software, hardware and go-live services. If needed the basic package can be enhanced by adding additional modules.

The simple Plug&Play package is based on standard components and processes. It makes implementing voice picking extremely easy as well as very affordable. In addition to Picking, other modules are available to extend functionality to cover everything from Goods In through to Dispatch including Product Counting whilst still keeping costs very much under control.

It especially offers small and medium sized businesses the opportunity to benefit from voice directed processes in 1 simple, easy to implement, ‘all in the box’ affordable package. Why spend more than you need to?

## Lydia® Plug&Play Basic Package

**Hands-free** / eyes-free

**Massive reduction** in error rates

**99.99% picking accuracy** on 1<sup>st</sup> time pick\*

\*based on typical voice installations

**Reduction** in credits

**Improved** customer satisfaction

## / Cost-effective

Affordable out of the box package for small and medium sized businesses.

## / Buy or lease

Purchase or lease options available with attractive packages.

“topsystem worked hard to make sure that we were comfortable with how we put the system in and how we were going to set about it. (...)

And then on one Monday morning the topsystem team arrived in Somerset and all the necessary bits were installed and set up. (...)

This was a project costing us just over € 38K and it was refreshing to deal with a company that were confident in their ability to provide us with something that we were going to be more than happy to pay for.”

**Paul James, Managing Director**  
**J&K Aquatics Ltd. , Somerset, United Kingdom**
